OTHER CONDITIONS CONTRIBUTING BUT NOT RELATED TO THE IMMEDIATE CAUSE OF DEATH

MANNER OF DEATH

ACCIDENT

HOW INJURY OCJURRED COMMERCIAL HELICOPTER CRASH, PASSENGER

оπ

From the anatomic findings and pertinent history I ascribe the death to:

#### Anatomic Summary:

- I. Blunt trauma, fatal.
  - A. Blunt trauma of head.
    - 1. Multiple lacerations of face, scalp, and neck.
    - 2. Multiple fractures of skull and face.
    - 3. Evisceration of brain.
  - B. Blunt trauma of chest and abdomen.
    - 1. Traumatic injuries of neck, left shoulder, and lower abdomen.
    - 2. Multiple fractures of ribs, spine, and hips.

3. Evisceration of internal organs.

C. Blunt trauma of extremities.

- A. Multiple fractures of left arm.
- B. Traumatic amputation of right arm.
  - 1. Right forearm and hand submitted separately.
- C. Multiple fractures of the femurs.
- D. Traumatic amputation of lower extremities.
  - 1. Both feet recovered.

II. Postmortem burns.

- A. Extensively burned skin of head, chest, and abdomen.
- B. 30% total body surface area burns.

C. No soot in trachea or bronchi.

III. Toxicology Report. A. Methylphenidate present.

Decedent is a 41-year-old Black male who on 1/26/2020 was a passenger in a commercial helicopter that crashed into the mountain side in the city of Calabasas. He was pronounced dead at the scene on 1/26/2020 at 1010 hours.

EVIDENCE OF INJURY:

Blunt trauma.

Blunt trauma of head. Examination of the head reveals a flattened but generally intact face and scalp. There is a 6 x 5 inch laceration of the frontal scalp involving the right eye exposing the cranial vault. No brain matter is identified. The left eye is present and appears to be brown in color with congested hemorrhagic sclera. The left lower chin shows a 6 x 6 inch laceration exposing the tongue and multiple fractured segments of mandible. Those fragments contained intact teeth. Examination of the occipital aspect of the scalp reveals a  $6 \times 4-1/2$  inch laceration involving the mid to left aspect of the scalp. There's also a laceration noted to the right superior parietal scalp. The neck area is exposed showing a segment of the cervical spine. The hyoid bone and thyroid cartilage show multiple fractures.

BLUNT TRAUMA OF CHEST AND ABDOMEN:

Examination of the skin reveals a large laceration involving the anterior neck, upward chest, and left shoulder area. The chest cavity is visible through this defect. A  $1-1/2 \times 1$  inch laceration is noted to the right lateral lower chest. The skin is torn below the pubic region and anteriorly and extends circumferentially toward the back just superior to the buttocks. Both clavicles, the entire rib cage, pelvis, and lumbar and sacral spine show fractures.

# **AUTOPSY REPORT**

DEPARTMENT OF MEDICAL EXAMINER-CORONER

Page 3

2020-00797 BRYANT, KOBE BEAN

No.

#### BLUNT TRAUMA OF EXTREMITES:

The left arm is attached and contains multiple fractures of the humerus, radius, and ulna. Lacerations are noted to the axillary region and mid upper arm. Examination of the hand reveals a laceration to the palmer aspect of the hand as well as dorsal aspect of the hand. There is avulsion of the 4<sup>th</sup> fingernail. There is traumatic amputation of the right arm. Submitted separately is the right forearm. The dorsal aspect shows a compound (open) fracture of the radius. The amputation site shows ragged skin and exposed muscle along with fragments of radius and ulna. Skin slippage is noted to the dorsal of the right hand. The ventral aspect shows a 2-1/2 inch laceration at the base of the thumb. Multiple tattoos are identified from the ventral aspect of the forearm. Examination of the lower extremities shows complete disruption of anatomic structures resulting in a fragmentation of muscle, tendon, and skin. A right femoral head is identified but no femoral condyle. The left femoral neck and hip is identified. A distal fragment of femur with condyle is noted. There appears to be a fracture of the lateral condyle. No feet are attached to the body. They are traumatically amputated above the ankle. Two feet present, are present inside multicolored court shoes. They are identified by shoe size. An amorphous mass of soft tissue is identified via DNA analysis as belonging to Kobe Bean Bryant.

#### **POSTMORTEM BURNS:**

Examination of the skin reveals extensive burning of the left temporal parietal scalp as well as right superior parietal scalp and right occipital scalp. The entire anterior chest shows extensive burning as well as a segment of the left lateral arm and hand. Examination of the back reveals focal areas of extensively burned skin involving the right midback and lower back. In aggregate it amounts to approximately 30% total body surface area burns.

BRYANT, KOBE BEAN

# Page<u>4</u>

EXTERNAL EXAMINATION:

The body is identified by toe tags and is that of an unembalmed Black male. The entirety of the body measures 65 inches which obviously does not reflect the original height of the body. The total weight of the body is 178 pounds. There is a partial tattoo noted to the right upper arm which is disrupted by the traumatic amputation and reveals what appears to be a segment of butterfly which is part of a crown and radiating dark lines expanding from the crown. Examination of the right forearm shows multiple tattoos which include the name "Bianka", below that is the word "Bella", below that is the name "Gianna", below that is the name "Maria-Onore", below that is the word "Natalia", and below that is the word "Diamante". Below that is a diamond. A mustache is noted to the upper lip. The left eye is brown and hemorrhagic. Lower teeth are present amongst the fractured mandible. The penis is identified and is circumcised but shows traumatic degloving.

# EVIDENCE OF THERAPUTIC INTERVENTION:

None. There has not been postmortem intervention for procurement.

### CLOTHING:

The body was not clothed but I did examine the clothing and it consists of the following: There are 7 items of clothing. Each shows tearing artifact and some show burned artifact and each has a strong odor of fuel. Of the 7 items only 2 are recognizable. One is a pair of underwear with the elastic band that reads Calvin Klein and the other is a pair of black pants with an elastic waist.

# **AUTOPSY REPORT**

DEPARTMENT OF MEDICAL EXAMINER-CORONER

2020-00797

BRYANT, KOBE BEAN

Page 5

# INITIAL INCISION:

The body cavities are entered through the standard coronal incision. The chest and abdominal cavities are empty secondary to traumatic evisceration. The entire rib cage is disrupted with multiple fractures of the cervical thoracic lumbar and sacral spine.

### SYSTEMIC AND ORGAN REVIEW

The following observations are limited to findings other than injuries which have been described above. Note: Minimal organs are recovered and only those will be described.

# CARDIOVASCULAR SYSTEM:

Two fragments of heart muscle are identified weighing in at aggregate 175 grams. Papillary musculature is identified, however, no other structures are noted.

### RESPIRATORY SYSTEM:

No soot is found in the upper respiratory or lower bronchial passages. A nearly intact left lung is identified which weighs 330 grams. A segment of right lung is attached to a bronchi and that segment weighs 75 grams. The parenchyma of both lung segments show hemorrhage.

# GASTROINTESTINAL SYSTEM:

A 200 cm segment of small and large bowel is recovered. Soft green stool is noted in the colon. The small bowel contents are minimal. No appendix is identified in any of the bowel segments.

# **AUTOPSY REPORT**

DEPARTMENT OF MEDICAL EXAMINER-CORONER

2020-00797

BRYANT, KOBE BEAN

Page 6

# HEPATOBILIARY SYSTEM:

A fragmented liver is recovered. This fragment weighs 200 grams. An attached gall bladder is noted which contains 1 cc of bile. This bile is collected.

### URINARY SYSTEM:

A single kidney which has been fragmented into three separate parts is collected. It weighs 120 grams. No other identifiable organs are identified.

### HISTOLOGIC SECTIONS:

Representative sections of various organs are preserved in one storage jar in 10% formalin.

### TOXICOLOGY:

Bile, liver tissue, and vitreous humor have been submitted to the lab. A comprehensive screen was requested.

### **PHOTOGRAPHY:**

Photographs have been taken prior to and during the course of the autopsy.

### RADIOLOGY:

The body was fluoroscoped and x-rays are taken of the head, chest, and extremities. X-rays reveal multiple fragmented bone involving the entire body.

### WITNESSES:

None.

Page 7

DIAGRAMS USED:

Diagram Form 20 and 43 were used during the performance of the autopsy. The diagrams are not intended to be facsimiles.

OPINION:

The cause of death of this 41 year old Black male identified as Kobe Bean Bryant, is due to blunt trauma. These injuries are rapidly if not instantly fatal. Thermal burns present on the head, chest, and extremities are postmortem and did not contribute to death. The manner of death is deemed accident.

**<u>RESULT</u>** <u>ANALYST</u>

NOTE: AKA John Doe. \*May not be Title 17 compliant; analysis performed in singlet due to limited specimen vo ume.

Legen	d:	ND	Not Detected	SNS	Specimen Not Suitable
g	Grams	ng/g	Nanograms per Gram	TNP	Test Not Performed
g'%	Gram Percent	ng/mL	Nanograms per Milliliter	ug	Micrograms
Ir c.	Inconclusive	PP	Presumptive Positive	ug/g	Micrograms per Gram
ng	Milligrams	QNS	Quantity Not Sufficient	ug/mL	Micrograms per Milliliter
Irc.	Inconclusive	PP QNS	Presumptive Positive	ug/g	Micrograms per Gram

The alcohol analysis was performed in accordance to California Code of Regulations "Title 17" compliance by a qualified analysi in the Forensic Toxicology Laboratory, Forensic Laboratories Division, County of Los Angeles Department of Medical Examiner - Coroner.

Enzyme-linked immunosorbant assay (ELISA) provides only a preliminary analytical result that is contingent upon a confirmatory test. A "presumptive positive" (PP) signifies a detection of a drug class and must be confirmed by additional testing for true identification and/or quantitation of specific drug(s) present in the specimen.

Per the Department's Evidence Retention Policy, the blood specimen(s) will be retained for one year (minimum) and all other specimens six months (minimum) from Autopsy.

Final Review By: Sarah Buxton de Quintana

Supervising Criminalist I

Date:

The above results relate only to the items sampled and tested and have been technically and administratively reviewed and are the opinions and conclusions of the analysts to ted. The final review has been certified by the noted Toxicologist to ensure that all standard operating procedures were followed as set by the Forensic Toxicology I aboratory. Forensic Sciences Laboratory Division, County of Los Angeles Department of Medical Examiner-Coroner.

County of Los Angeles, Department of Coroner Investigator's Narrative

Case Number: 2020-00797

Decedent: BRYANT, KOBE BEAN

# **Information Sources:**

1. Aircraft Accident Investigation Report, National Transportation Safety Board, Washington D.C. 20594.

2. On scene investigation.

### Investigation:

initial reports indicate that on 01/26/2020 at approximately 0945 hours multiple witnesses called 911 reporting that a helicopter had crashed into the foothills of the Santa Monica mountains above Las Virgenes Road in the City of Calabasas. Deputies from the Los Angeles County Sheriff's Department and personnel from the Los Angeles County Fire Department responded to the scene. Upon arrival to the scene nine decedents were located and pronounced dead at 1010 hours by Los Angeles County Fire Department personnel.

On 01/26/2020 at 1338 hours Officer Rodriguez from the Los Angeles County Sheriff's Department-Homicide Bureau called to report this multi-decedent helicopter crash fatality to Investigator Jeffrey Guilmette at the Los Angeles County Department of the Medical Examiner-Coroner. I was assigned this Special Operations Response Team (SORT) field case at 1400 hours by Acting Supervisor Anthony Lopez. I arrived on scene at approximately 1620 hours and cleared the scene at approximately 1930 hours. On 01/26/2020 the following SORT team members responded to the scene for a coordinated search and decedent removal:

M. Lee #605743, L. Cervantes #639654, P. Ngayan #531611, B. Kim #602036, E. Napoles #465129, M. Gutierrez #479704, R. Estrada #486093, R. Gonzalez #503064, J. Fallot #644073.

On 01/27/2020 at approximately 0630 hours I returned to the scene and cleared the scene at approximately 1600 hours. On 01/27/2020 the following SORT Team Members returned to the scene for a continued coordinated search and decedent removal:

M. Lee #605743, L. Cervantes #639654, P. Ngayan #531611, B. Kim #602036, E. Napoles #465129, M. Gutierrez #479704, R. Estrada #486093, R. Gonzalez #503064, J. Fallot #644073. F. Fernandez #486349, M. Molina #421452.

Forensic Attendant P. Ngayan transported all decedents to the Forensic Science Center.

Also present at the scene were Chief B. Elias, Captain E. Tauscher and Dr. J. Lucas.

### Location:

Place of Injury/Death: Mountainside, 4232 Las Virgenes Road, Calabasas, CA 91303.

### Informant/Witness Statements:

A review of a report issued by the National Transportation Safety Board revealed the following information:

On 01/26/2020 at 0945 hours a Sikorsky S-76B helicopter, N72EX, collided with hilly terrain near the city of Calabasas. The helicopter held 8 passengers and a pilot who were all killed on impact. The Sikorsky was in an 8-passenger seat configuration with two pilot stations up front and eight passengers in the rear, separated by a bulkhead with sliding acrylic windows. Passenger seating was 2 four-occupant divans, one facing forward and the other rearward. A main impact crater measuring 24 feet by 15 feet in diameter was observed with the main wreckage noted to be about 127 feet along a 347° true bearing from the impact crater. The helicopter was destroyed by impact forces and fire with the entire fuselage/cabin and both engines subjected to a post-crash fire.

County of Los Angeles, Department of Coroner Investigator's Narrative

Case Number: 2020-00797

Decedent: BRYANT, KOBE BEAN

# Scene Description:

The scene is mountainous, vegetation covered terrain located east of 4232 Las Virgenes Road in the City of Calabasas. Due to the size of the scene a stake was placed at a central point located just north of what appears to be the main fuselage. The GPS coordinates of the stake were 34°8′14″ N and 118°41′33″ W. What appeared to be an initial point of impact designated by a disturbance to the soil and vegetation and various helicopter parts, personal property and human remains were located approximately 120 feet south of the designated central stake. What appeared to be a white and blue helicopter tail piece printed with "Sikorsky" was located down a western slope from the initial point of impact. The helicopter wreckage, personal property and human remains were spread in a cone shape across the area starting at the initial point of impact and spreading toward the north stopping at the north side of a ravine. A designated hiking/bicycle path was located surrounding the scene.

### **Evidence:**

No evidence was collected for this case.

# Body Examination:

The decedent is an adult Black male I observed lying on the ground just south of the main fuselage in the above described scene. He was wearing black pants, a sweater, underwear and a shirt. He has black hair, an unknown eye color and natural teeth. Upon external examination I observed significant trauma to his head, right arm and lower body.

### **Identification:**

The decedent was positively identified as Kobe Bean Bryant (DOB: 08/23/1978) via Department of Justice fingerprints.

# Next of Kin Notification:

Chief B. Elias provided telephonic notification of the decedent's death to decedent.

# **Tissue Donation:**

Not addressed.

# **Autopsy Notification:**

No exam request was noted.
